Take I-96 East to I-27N/69 E, exit Saginaw/River Avenue. Turn left and follow sign to Grand River Avenue. The goal of this course is for the following objectives to be understood and utilized within your practice:

- Appropriate timing and efficacy of vaccinations recommended for solid organ transplant recipients
- Process of the living kidney donor evaluation including the absolute and relative contraindications and long term health outcomes in living kidney donors
- How ACA insurance plans coordinate with ESRD Medicare
- Historical context of performing solid organ transplantation in the management of patients with organ failure and progress made over the past 50 years
- Diagnosis and up-to-date treatment of bone disease of patients on long-term steroid therapy
- How deceased donor kidneys are allocated, evaluated and selected
- Improve transplant education and patient care for patients and dialysis centers
- Evaluation and management of elderly kidney transplant patients
- How the bladder can be tested to identify abnormalities in storage and emptying
- Facilitate a successful transition from pediatric to adult care for children with kidney transplant

WHO SHOULD ATTEND

This course will be of particular interest to nephrologists, primary care physicians, dialysis center staff, nurses, social workers, physician assistants, and other health care professionals who care for kidney and pancreas transplant candidates and recipients.
