AATS 95TH ANNUAL MEETING 2015

PRELIMINARY PROGRAM

April 25 – 29, 2015
Washington State Convention Center
Seattle, WA, USA

www.aats.org
Dear Colleagues,

I hope you will join me and my Co-Chairs, David H. Adams and Yolonda L. Colson, for AATS Week 2015 which begins with our two-day Mitral Conclave in New York City, April 23 and 24 and continues with our 95th Annual Meeting in the beautiful city of Seattle Washington, April 25 through 29, 2015. I promise you a week of extraordinary science, and a unique opportunity to interact with your colleagues from around the world as we share the latest advances in our specialty.

On Saturday in Seattle, our very popular Skills Courses in Adult Cardiac Surgery, Congenital Heart Disease, and General Thoracic Surgery will be supplemented by two featured sessions. One will cover Optimal Therapies for End Stage Thoracic Organ Failure highlighting the role of the surgeon and the use of ECMO, MCS and Transplantation, and the second will be the annual Allied Health Personnel Symposium as AATS stresses the "team" approach to cardiovascular diseases.

Sunday’s Postgraduate Courses addressing all aspects of our specialty will be complemented by the Legends Luncheons during which Professor Magdi Yacoub will address the Adult and Congenital attendees, while Dr. Jean DesLauriers will present at the General Thoracic Surgery Symposium.

Once again a “single ticket” format for each day will be in place for the Saturday and Sunday programs, allowing attendees to move freely between the various programs, making it easy to pick and choose presentations of particular interest to them.

The Plenary and Simultaneous Sessions have been developed by the Abstract Committee from a near record number of abstracts submitted. Monday’s Plenary will highlight our Basic Science Lecturer, Dr. Donald E. Ingber, a founder of the Wyss Institute for Biologically Inspired Engineering and Professor at Harvard University. Dr. Ingber will be addressing how biologically inspired materials and devices are being developed that will solve critical medical and environmental problems. The afternoon’s Simultaneous Sessions will conclude with the 18th Lillehei Resident Forum featuring the top eight submissions by residents from around the country.

Tuesday morning’s program will begin with a newly designed Emerging Technologies and Techniques Forum which will be divided into Cardiac and General Thoracic sections. These will be complemented by a new session on VAD ECMO, in response to the large number of abstracts submitted on this topic, and the customary Cardiac and General Thoracic Fora and a Video Session.

The Plenary Session on Tuesday will feature our Honored Guest Lecturer, Colonel Casey Haskins (ret), founder and CEO at BLK SHP Innovation, LLC, a management consulting firm which helps leaders develop an experimental innovation mindset, facilitating the discovery and reinvention of solutions to ongoing and intractable problems. Colonel Haskins’ presentation, entitled Three Ideas About Changing Things will supplement my Presidential Address on Monday morning during which I will discuss the close links between advances in technology innovation and Cardiothoracic Surgery.

These lectures compliment the concepts of Technological Innovation in Cardiothoracic Surgery: A Pragmatists Approach that I will discuss in the 95th Presidential Address.

A novelty at this year’s meeting will be the “Deep Dive” sessions which will take place during breaks in the scientific program. Authors of specific papers will be invited to mini-theaters in the Exhibit Hall to add to their podium presentations and address questions from a small panel of colleagues selected by the Abstract Committee. While in the Exhibit Hall you should take a few minutes not only to evaluate the latest in surgical instrumentation, devices and support systems but to also attend the expanded scientific poster session which will include the work of residents from around the world and Allied Health professionals together with the Top Gun and Jeopardy programs.

Wednesday morning’s session has been changed this year to include two and one-half hours of Simultaneous Sessions for the three subspecialties and conclude with the very popular Masters of Surgery Video Sessions initiated last year, featuring procedures illustrated and described by leaders in our specialty.

My Annual Meeting Co-Chairs and I, along with the rest of the Abstract Committee, look forward to welcoming you to this exciting AATS Week 2015 both in New York with the Mitral Conclave and Seattle with our 95th Annual Meeting. This will be a truly global meeting, which will benefit you and your patients.

Pedro J. del Nido  
Boston Children’s Hospital
EDUCATIONAL OBJECTIVES
At the conclusion of the AATS Annual Meeting, through comprehensive lectures & discussions, participants will be able to:

- Identify the latest techniques and current research specifically related to Adult Cardiac Surgery, Congenital Heart Disease, General Thoracic Surgery and Perioperative Care.
- Select appropriate surgical procedures and other interventions for their own patients based upon results presented.
- Incorporate the basic science developments & emerging technologies & techniques across the spectrum of cardiothoracic surgery.
- Communicate current practice management necessary for the effective and safe delivery of patient care.
- Translate expanded knowledge into practice for the improvement of patient outcomes and satisfaction.

WHO SHOULD ATTEND
The AATS Annual Meeting is specifically designed to meet the educational needs of:

- Cardiothoracic Surgeons
- Physicians in related specialties including Cardiothoracic Anesthesia, Critical Care, Cardiology, Pulmonology, Radiology, Gastroenterology, Thoracic Oncology and Vascular Surgery
- Fellows and Residents in Cardiothoracic and General Surgical training programs
- Allied Health Professionals involved in the care of cardiothoracic surgical patients including Physician Assistants, Nurses, Surgical Assistants and Perfusionists
- Medical students with an interest in cardiothoracic surgery

AATS ANNUAL MEETING ACCREDITATION

ACME Accreditation Statement
The American Association for Thoracic Surgery is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

This live activity has been approved for **33 AMA PRA Category 1 Credit(s)™.
**Credit hours subject to change.

Disclosure Statement
It is the policy of the American Association for Thoracic Surgery (AATS) that any individual who is in a position to control or influence the content of an educational activity to disclose all relevant financial relationships or affiliations. All identified conflicts of interest must be resolved and the educational content thoroughly vetted by AATS for fair balance, scientific objectivity, and appropriateness of patient care recommendations. In addition, faculty members are asked to disclose when any discussion of unapproved use of pharmaceuticals or medical devices occur.

For further information on the Accreditation Council for Continuing Medical Education (ACCME) Standards of Commercial Support, please visit www.accme.org.

- **Nursing** This program will be submitted to the American Academy of Nurse Practitioners (AANP) for continuing education credit.
- **Perfusion** This program will be submitted to the American Board of Cardiovascular Perfusion (ABCP) for continuing education credit.
- **Physician Assistant** This program will be submitted to the Physician Assistant Review Panel for continuing education credit.
EXHIBIT HALL HIGHLIGHTS
In addition to lunches being available in the exhibit hall there will be plenty of open displays for you to view daily.

Sunday, April 26  5:00 pm - 7:00 pm
Welcome Reception
Resident Poster Competition
Allied Health Poster Competition
AATS Learning Center
AATS Mini-Theater Presentations

Monday, April 27  9:00 am - 4:30 pm

*John S. Ikonomidis, Medical University of South Carolina
What I Would Choose to Do for My Thoracoabdominal Aorta Repair
*Joseph S. Coselli, Baylor College of Medicine

HANDS-ON SESSION 4:00 – 6:00 pm Separate Registration Required

This activity has been developed in recognition of the American Board of Medical Specialties Six Core Competencies. This activity will increase your competency in the areas of Patient Care, Medical Knowledge, Interpersonal and Communication Skills, Professionalism, Systems-based Practice, and Practice-based Learning and Improvement.

The AATS has designated the primary competency each session will address.
ANNUAL MEETING

SATURDAY, APRIL 25, 2015 8:00 am - 3:30 pm
Course Chair: *Erle H. Austin, III, University of Louisville

This course will focus on the technical skills required for performing certain congenital cardiac operations, and decision making skills required to select the appropriate patient for those operations. The presentations will focus on different practice gaps. Areas addressed will include tetralogy/pulmonary atresia with major aortopulmonary collaterals, recruitment of the borderline left ventricle, mechanical device implantation, and innovative techniques to repair truncus arteriosus and its associated conditions. A didactic session will describe recent imaging and modeling techniques for complex congenital lesions.

PA/VSD/MAPCs - Technique for Early Complete Repair
*Frank L. Hanley, Stanford University

Neonatal Pulmonary Artery Rehab without Unifocalization
*Yves d’Udekem, Royal Children’s Hospital

Panel Discussion with Case Presentations
*Erle H. Austin, III, University of Louisville
*Yves d’Udekem, Royal Children’s Hospital
*Frank L. Hanley, Stanford University

The Borderline Left Ventricle: What is it? Recruit it or Forget it?
*James S. Tweddell, Medical College of Wisconsin

Techniques for Recruiting the Borderline Left Ventricle
Sitaram Emami, Boston Children’s Hospital

Where to Draw the Line
*Thomas L. Spray, Children’s Hospital of Philadelphia

Modified Truncus Arteriosus
George Alfieri, University of Rochester

Repairing/Replacing the Insufficient Truncal Valve
Mark Gerard Hazekamp, Leiden University

Reprint all above without the asterisk signs to see the names of the speakers associated with each presentation.

CONGENITAL HEART DISEASE SKILLS Dealing with Challenging Conditions - Pearls and Pitfalls

SATURDAY, APRIL 25, 2015 8:00 am - 3:30 pm
Course Co-Chair: *Pascal Thomas, North University Hospital

This session will consist of multiple short talks addressing specific new techniques in lung and esophageal surgery. The focus of this session will be on the technical aspects as presenters address issues such as indications, contraindications, and expected outcomes. This course will focus on the technical skills required for performing certain congenital cardiac operations, and decision making skills required to select the appropriate patient for those operations. The presentations will focus on different practice gaps. Areas addressed will include tetralogy/pulmonary atresia with major aortopulmonary collaterals, recruitment of the borderline left ventricle, mechanical device implantation, and innovative techniques to repair truncus arteriosus and its associated conditions. A didactic session will describe recent imaging and modeling techniques for complex congenital lesions.

Minimally Invasive Approaches to Diagnosis & Staging
*Ara A. Vaporciyan, MD Anderson Cancer Center

HANDS-ON SESSION 4:00 am - 6:00 pm Separate Registration Required
AATS/STS ADULT CARDIAC SURGERY SYMPOSIUM
Decision Making in Adult Cardiac Surgery

SUNDAY, APRIL 26, 2015 8:00 am - 5:00 pm
Course Chair: *A. Marc Gillinov, Cleveland Clinic
Course Co-Chair: *Robert Dion, Ziekenhuis Oost-Limburg

This program will present the latest data to guide decision-making in adults undergoing cardiac surgery. Throughout this session participants will learn how to offer the best operations in patients with coronary artery disease, aortic disease, mitral regurgitation & cardiac emergencies.

CABG
Moderators:
*A. Marc Gillinov, Cleveland Clinic
*Craig R. Smith, Columbia University

When is CABG Clearly Superior to PCI?
*A. Pieter Kappetein, Erasmus MC

CABG & Arterial Grafts: How Many is Enough?
*Bruce W. Lytle, Cleveland Clinic

How to Maintain Outcomes & Quality in CABG
*Clifford W. Barlow, Southampton General Hospital

When to use Alternative Strategies: Hybrid, Connectors, Robot...
*John D. Puskas, Mount Sinai Beth Israel

AVR & Aorta
Moderators:
*Tirone E. David, Toronto General Hospital
*Robert A. Dion, Ziekenhuis Oost-Limburg

Debate: Mechanical or Bioprosthesis?
Mechanical: *Thierry-Pierre Carrel, University of Bern
Bioprosthesis: *Anelche C. Anyanwu, Mount Sinai Medical Center

The Ascending Aorta with a Bicuspid Aortic Valve: Replace, Repair or Ignore
*Michael A. Borger, Columbia University

TEVAR for Dissection
*Eric E. Roselli, Cleveland Clinic

LEGENDS LUNCHEON
12:00 - 1:00 pm
*Professor Sir Magdi Yacoub, Imperial College, London

AATS/STS CONGENITAL HEART DISEASE SYMPOSIUM
Unsettled and Unanswered Questions in Congenital Heart Surgery

SUNDAY, APRIL 26, 2015 8:00 am - 5:00 pm
Course Chair: *Robert Jaquiss, Duke University
Course Co-Chair: *Victor Tsang, Great Ormond Street Hospital

The AATS/STS Congenital Heart Disease Symposium will address a variety of unsettled issues in congenital heart surgery, present complex problems in surgical decision making with suggested solutions, and explore the ongoing challenges in management of patients with Fontan circulation. The course will also describe surgical approaches to malformations of the aortic and pulmonary valves.

Controversies & Debates
Moderators:
*Robert D. Jaquiss, Duke University
*Thomas L. Spray, Children’s Hospital of Philadelphia

Debate: Neonatal Aortic Stenosis Is a Surgical Disease
Pro: Viktor Hraska, German Pediatric Heart Centre
Con: Lee Benson, Hospital for Sick Children Toronto

Debate: Anomalous Aortic Origin of a Coronaries Artery is Always a Surgical Disease
Pro: *Pascal R. Youhe, L’Université Paris Descartes
Con: *Ralph S. Mosca, NYU Langone Medical Center

Debate: Larger Centers Produce Better Outcomes In Pediatric Cardiac Surgery - Regionalization Is a Superior Model
Pro: *Charles D. Fraser, Texas Children’s Hospital
Con: Mark Danton, Royal Hospital Sick Children Hospital Glasgow

*A. Marc Gillinov, Cleveland Clinic

Avoid SAM
*Robert A. Dion, Ziekenhuis Oost-Limburg

Long-term Outcomes (Beyond Reop.) & Quality after MV Repair
*Rakesh M. Suri, Mayo Clinic

Ischemic MR: Repair or Replace?
*Michael A. Acker, University of Pennsylvania

Who Should Get a Mitraclip?
*Hermann Reichenspurner, University Hospital Eppendorf

AF Ablation: Which Operation?
*A. Marc Gillinov, Cleveland Clinic

Functional TR: When to Fix It
*James S. Gammie, University of Maryland

Cath Lab Catastrophes
*R. Duane Davis, Jr., Duke University

Cardiac Surgeon On Call
Moderators:
*Robert A. Dion, Ziekenhuis Oost-Limburg
*Bruce W. Lytle, Cleveland Clinic

Post-pump Failure
*Nicholas G. Smedira, Cleveland Clinic

Acute Aortic Dissection: Decision & Outcome
*Marc R. Moon, Washington University

Postinfarct VSD: Operate or Wait?
*Louis P. Perrault, Montreal Heart Institute

Traumatic Aortic Isthmus Rupture: Always an Emergency?
*Bartley P. Griffith, University of Maryland

For additional details regarding the presentations, abstracts, and authors, please visit www.aats.org/annualmeeting
AATS/STS GENERAL THORACIC SURGERY SYMPOSIUM
The Evolving Role of Thoracic Surgeons

SUNDAY, APRIL 26, 2015 8:00 am – 5:00 pm
Course Chair: *Gail E. Darling, Toronto General Hospital
Course Co-Chair: *Gaetano Rocco, National Cancer Institute

Lung cancer screening and its impact on thoracic surgeons will be discussed including surgical and nonsurgical management of small lung nodules. The role of surgery for N2 disease and T4 tumors will be critically evaluated.

Changing indications, management and complications of esophagectomy will be presented with emphasis on the importance of thoracic surgeons in the management of patients with esophageal cancer. In benign esophageal disease, techniques for management of achalasia will compare POEM to laparoscopic Heller Myotomy, while the utility of transthoracic hiatus hernia repair will be evaluated in the era of laparoscopic hiatal hernia surgery.

The changing role of thoracic surgeons in infectious disease will review the reduced need for surgery for management of empyema, the increasing role of surgery for management of mycobacterial disease and the role of ECMO for pneumonias.

Changes in health care economics and what surgeons need to know, will be explored through discussion of quality metrics and third party payers.

---

Minimally Invasive Diagnostic Techniques for Tissue Diagnosis of Lung Lesions: Radial Miniprobe, Navigational Bronchoscopy—Do We Need Percutaneous Biopsy?
*Kazuhito Yasufuku, University of Michigan

The Current Practice of Invasive Mediastinal Staging: EBUS, Mediastinoscopy, Mediastinal Lymphadenectomy, VAMLA - Differences between Guidelines & Reality: When is mediastinal Node Sampling not Indicated?
*Paul De Leyn, Catholic University Leuven

Gladiators - Who Should Be Responsible for the Initial Diagnosis & Staging of Lung Cancer? Surgeons vs. Non-Surgeons: Competition or Collaboration?
*Malcolm M. DeCamp, Jr., Northwestern Memorial Hospital
Moishe Liberman, Centre Hospitalier de l’universite de Montreal

Wedge Resection Is a Palliative Procedure for Lung Cancer
*Thomas A. D’Amico, Duke University
*Douglas E. Wood, University of Washington

Preservation of the Pulmonary Valve (Not Just the Annulus) in Repair of Tetralogy of Fallot
*Giovanni Stellin, University of Padova

Mechanical Pulmonary Valve Replacement
*Joseph A. Dearani, Mayo Clinic

Are Stented Bioprosthesis Appropriate for Aortic Valve Replacement in Young Patients
*Frank A. Pigula, Boston Children’s Hospital

Transcatheter/Hybrid Aortic Valves in the Young
*Thomas Walther, Kerckhoff Clinic

Outflow Valve Surgery in Children & Adults with Congenital Heart: Part II: Aortic Valve Replacement
Moderators:
*Pedro J. del Nido, Boston Children’s Hospital
*Victor T. Tsang, Great Ormond Street Hospital

Reinforced Ross Procedure
*Thierry-Pierre Carrel, University of Bern

When & How to Enlarge the Aortic Root
*Victor T. Tsang, Great Ormond Street Hospital

Mechanical AVR in the Young: Lower Anticoagulation - Pregnancy - Novel Anticoagulants
*Hartzell V. Schaff, Mayo Clinic

Aortic Valve Repair in Teenagers & Young Adults: When to Do It & When Not to Do It
*Pedro J. del Nido, Boston Children’s Hospital

---

**Lung Cancer:** Moderators:
*Joseph B. Shrager, Stanford University
*Dennis Wigle, Mayo Clinic

SBRT & Wedge Resection Are Equivalent Therapies for Early Stage Lung Cancer & Oligometastatic Disease
*David C. Rice, MD Anderson Cancer Center
*Scott J. Swanson, Brigham & Women’s Hospital

Surgeons & SBRT: How to Incorporate SBRT Into Your Practice
*Stephen R. Hazelrigg, Southern Illinois University

Ask the experts - Small Lung Nodules: What do They Really Do?
Moderator & Expert:
*Dennis Wigle, Mayo Clinic

Experts:
*Thomas A. D’Amico, Duke University
*Hiroshi Date, Kyoto University
*Frank C. Detterbeck, Yale University
Henrik Jessen Hansen, Rigshospitalet

Locally Advanced Lung Cancer - Complex Pulmonary Resections: Indications, Evaluation, Technique, Tips & Tricks, & Results - Is it Worth the Risk?
Olaf Mercier, Marie Lannelongue Hospital

N2 - Current Evidence: Is There Role for Surgery? Is There a Role for Postop Radiation for Surprise N2?
Linda W. Martin, University of Maryland

Surgery for Stage IIIA N2 is a Surgical Disease
*Philippe G. Dartevelle, Marie Lannelongue Hospital
*Frank C. Detterbeck, Yale University
SUNDAY APRIL 26

**LEGENDS LUNCHEON**

12:00 - 1:00 pm
*Jean Deslauriers, Institut Universitaire De Cardiologie Et De Pneumologie de Québec, Canada

---

**Surgery for Mycobacterial Disease - TB & Atypical TB: Increasing Role for Surgery, Relearning Old Lessons**
*John D. Mitchell, University of Colorado

**Infectious Problems in Thoracic Surgery**
Moderator:
*Joseph B. Zwischenberger, University of Kentucky

**Extracorporeal Lung Support for Pneumonia: Indications & Results**
Marcelo Cypel, Toronto General Hospital

**Post Pneumonic Empyema: Is There Still a Role for Surgery?**
*M. Blair Marshall, Georgetown University

**Does the Surgeon Have a Role in the Management of Early (HGD-T1a) Esophageal Cancer?**
Brian E. Louie, Swedish Cancer Institute

**Esophageal Disease**
Moderators:
*Gail E. Darling, Toronto General Hospital
*Gaetano Rocco, National Cancer Institute

**Surgery for Squamous Cell Cancer of the Esophagus: Only for Salvage or as Part of Combined Modality Therapy?**
*Stephen G. Swisher, MD Anderson Cancer Center

**T2 Esophageal Cancer: Does it Exist? Should You Give Preop Therapy?**
*Traves D. Crabtree, Washington University

**Rescue for Complications Post Esophagectomy: The Role of Early Diagnosis & Intervention**
*Andrew C. Chang, University of Michigan

**Primary Surgical Management of Esophageal Achalasia – POEM vs. Laparoscopic Myotomy**
*Steven R. DeMeester, University of Southern California

**Transesophageal Hiatal Hernia Repair: Of Historic Interest Only?**
*Thomas K. Varghese, Jr., University of Washington

**Why Quality Is the New Black**
*Shaf Keshavjee, Toronto General Hospital

**Thoracic Surgery - Metrics & Third Party Payers**
Moderator:
*Claude Deschamps, University of Vermont

**What the Surgeon Needs To Know About Databases: How They Can Help You or Hurt You**
*Alessandro Brunelli, St. James’s University Hospital

**Outcome vs. Process Quality Indicators: What Is the Difference & How to Use Them**
*Cameron D. Wright, Massachusetts General Hospital

**Never Ever Events in Surgery**
*Stephen D. Cassivi, Mayo Clinic

**Ask the Experts - How to Practice Thoracic Surgery in the Pay for Quality Era**
Moderator & Expert:
*Douglas E. Wood, University of Washington

Experts:
*Alessandro Brunelli, St. James’s University Hospital
*Stephen D. Cassivi, Mayo Clinic
*Claude Deschamps, University of Vermont
*Shaf Keshavjee, Toronto General Hospital
*Cameron D. Wright, Massachusetts General Hospital

For additional details regarding the presentations, abstracts, and authors, please visit www.aats.org/annualmeeting
MONDAY, APRIL 27, 2015

**PLENARY SCIENTIFIC SESSION**

**MONDAY, APRIL 27, 2015** 7:20 am – 12:30 pm
**BUSINESS SESSION** AATS Members Only 7:20 – 7:30 am

**Plenary Scientific Session**
Moderators: *Pedro J. del Nido,* *Joseph S. Coselli,* & *Marc R. Moon*

1. Outcomes of 3264 Thoracoabdominal Aortic Aneurysm Repairs  
   *Joseph S. Coselli*, Baylor College of Medicine, Texas Heart Institute, Houston, TX

2. Late Survival & Right Ventricular Performance in 332 Matched Children: Classic Norwood-BT Shunt Versus Norwood-Sano Modification  
   *Travis J. Wilder*, Heart Surgeons Society Data Center, Toronto, ON, Canada

3. Randomized Trial of Digital Versus Analog Pleural Drainage in Patients With or Without a Pulmonary Air Leak after Lung Resection  
   *Sebastien Gilbert*, University of Ottawa, Ottawa, ON, Canada

4. Positive Impact of Concomitant Tricuspid Annuloplasty on Tricuspid Regurgitation, Right Ventricular Function, and Pulmonary Artery Hypertension after Degenerative Mitral Repair  
   *Donald E. Ingber*, The Icahn School of Medicine at Mount Sinai, New York, NY

**AWARD PRESENTATIONS**

**BASIC SCIENCE LECTURE**
9:45 – 10:25 am
Donald E. Ingber, MD, PhD, Wyss Institute for Biologically Inspired Engineering at Harvard University

**ADULT CARDIAC SURGERY** Simultaneous Scientific Session

**MONDAY, APRIL 27, 2015** 2:00 – 5:00 pm
Moderators: *John D. Puskas* & *Leonard N. Girardi*

7. Appropriate Patient Selection or Healthcare Rationing? Lessons from Surgical Aortic Valve Replacement in the PARTNER-I Trial  
   *Wilson Y. Szeto*, University of Pennsylvania Medical Center, Philadelphia, PA

8. Prosthesis-Patient Mismatch in High Risk Patients with Severe Aortic Stenosis in a Randomized Trial of a Self-Expanding Prosthesis  
   *George L. Zorn*, III, University of Kansas, Kansas City, KS

9. Long-term Outcomes of the Cox-Maze IV procedure for Atrial Fibrillation  
   *Timothy S. Lancaster*, Washington University, St Louis, MO

10. Implications of Lesion Complexity on Process & Outcomes of Mitral Valve Repair for Degenerative Mitral Regurgitation  
    *Anelechi C. Anyanwu*, Mount Sinai Medical Center, New York, NY

11. A Contemporary Analysis of Pulmonary Hypertension in Patients Undergoing Mitral Valve Surgery: Is this a Risk Factor?  
    *Daniel H. Enter*, Northwestern, Chicago, IL

12. Transcatheter Valve-in-Valve Therapy using Five Different Devices in Four Anatomic Positions - Clinical Outcomes & Technical Considerations  
    *Lenard Conradi*, University Heart Center Hamburg, Hamburg, Germany

**CONGENITAL HEART DISEASE** Simultaneous Scientific Session

**MONDAY, APRIL 27, 2015** 2:00 – 5:00 pm
Moderators: *Carl L. Backer,* *Emile A. Bacha,* *Mark S. Bleiweis,* & *Pirooz Eghtesady*

13. Outcomes Following Simple & Complex (Damus-Kaye-Stansel Takedown) Ross Operations in 58 Consecutive Pediatric Patients  
    *Alejandra Bueno*, Boston Children’s Hospital & Harvard Medical School, Boston, MA

14. Ultra Long Term Outcomes in Adult Survivors of Tetralogy of Fallot & the Effect of Pulmonary Valve Replacement  
    *Richard Dobson*, Scottish Adult Congenital Cardiac Service, Glasgow, United Kingdom

15. Long-term Mortality after the Fontan Operation: Twenty Years of Experience at a Single Center  
    *Tacy E. Downing*, The Children’s Hospital of Philadelphia, Philadelphia, PA

16. Long-term Outcomes after First-onset Arrhythmia in Fontan Physiology  
    *Yves d’Udekem*, The Royal Children’s Hospital, Parkville, VIC, Australia

17. The Impact of Non-cardiac & Genetic Abnormalities on Outcomes Following Neonatal Congenital Heart Surgery  
    *Bahaaldin Alsoufi*, Emory University, Atlanta, GA

18. Health-Related Quality of Life in Adult Survivors after the Fontan Operation  
    *James K. Kirklin*, University of Alabama at Birmingham, Birmingham, AL

19. Aortic Dilatation is Not Associated with Aortic valvulopathy in Patients with Bicuspid Aortic Valve  
    *Byron K. Yip*, Northwestern University, Chicago, IL

**NEW MEMBER INDUCTION**

**PRESIDENTIAL ADDRESS**
11:25 – 12:15 am  
**Technological Innovation In Cardiothoracic Surgery: A Pragmatists Approach**  
*Pedro J. del Nido*, Boston Children’s Hospital

**LUNCH IN THE EXHIBIT HALL** 12:30 – 2:00 pm

**ETHICS FORUM LUNCH** 12:30 – 2:00 pm  
Separate Registration Required

Should a physician inform an innocent contact about HIV exposure, against state law?  
Moderator: *Richard I. Whyte,* Harvard University, Boston, MA
Con: *Stephen F. D’Neill,* Beth Israel Deaconess Medical Center, Boston, MA
Pro: *Richard I. Whyte,* Harvard University, Boston, MA

**CT RESIDENTS LUNCH** 12:30 – 2:00 pm

**PRESIDENTIAL ADDRESS**

**CT RESIDENTS LUNCH** 12:30 – 2:00 pm
MONDAY, APRIL 27, 2015 2:00 – 5:00 pm
Moderators: *David J. Sugarbaker & *Jay M. Lee
20. Multimodality Therapy for Locally Advanced Thymomas: A Cohort Study of Prognostic Factors from a European Multicentric Database
Giovanni Leuzzi, Regina Elena National Cancer Institute - IFO, Rome, Italy
21. Giving Induction Radiation in Addition to Chemotherapy Does Not Improve Survival of Non-Small Cell Lung Cancer Patients with Operable Mediastinal Nodal Disease
Chi-Fu Jeffrey Yang, Duke University, Durham, NC
22. The Impact of Adjuvant Chemotherapy in Pulmonary Large Cell Neuroendocrine Carcinoma: Results of an International Multi-Institutional Propensity Score-Adjusted Cohort Study on behalf of the European Society Of Thoracic Surgeons Neuroendocrine Tumors Working
Pier Luigi Filosso, University of Torino Italy, Torino, Italy

23. Validation Study of the Proposed IASLC/ITMIG Staging Revisions of the Thymic Carcinoma Using Data from 287 Patients
Yang Zhao, Shanghai Chest Hospital, Shanghai, China
24. Routine VTE Screening after Pneumonectomy: You Must Look to Find Siva Raja, Cleveland Clinic, Cleveland, OH
25. Accelerated Hemithoracic Radiation followed by Extrapleural Pneumonectomy for Malignant Pleural Mesothelioma *Marc De Perrot, Toronto General Hospital & Princess Margaret Hospital, Toronto, ON, Canada
26. Is Surgical Resection Justified for Myasthenia Gravis? Long-term Results in Over 1000 Cases Andrew Kaufman, Icahn School of Medicine, Mount Sinai Health System, New York, NY

PERIOPERATIVE CARE  Simultaneous Scientific Session

MONDAY, APRIL 27, 2015 2:00 – 5:00 pm
Moderators: *Glenn J. Whitman & Katherine J. Hoercher
27. Modified Perioperative Management Improves the Early Outcomes in Hemodialysis Patients Undergoing Cardiac Surgery
Hiroyuki Tsukui, Tokyo Women’s Medical University, Tokyo, Japan
28. Preoperative Anemia versus Blood Transfusion: Which is the Culprit for Worse Outcomes in Cardiac Surgery? Damien J. LaPar, University of Virginia, Charlottesville, VA
29. The Use of Humidified CO2 with a Novel Diffuser to Prevent Air Embolism in Open Heart Surgery
Adam El-Gamel, Waikato Hospital, Hamilton, New Zealand
30. How Detrimental is Reopening for Bleeding after Cardiac Surgery? Analysis from 16,793 Cases *Marc Ruel, University of Ottawa, Ottawa, ON, Canada
31. Use of Cumulative Data in Funnel Plots to Evaluate Performance Improvement in Cardiac Surgery *James R. Edgerton, The Heart Hospital Baylor Plano, Plano, TX

PERIOPERATIVE CARE  Simultaneous Scientific Session

MONDAY, APRIL 27, 2015 5:00 – 6:30 pm
Chairs: *Todd K. Rosengart & *Joseph B. Zwischenberger
L1. ORK2 Inhibition Reduces Post-Myocardial Infarction Cardiac Fibroblast Mediated Adverse Remodeling Jennifer L. Philip, University of Wisconsin, Madison, WI
L2. Ribosomal Dysfunction Results in Immunologic Susceptibility to Lung Cancer
Stephanie H. Chang, Washington University, St Louis, MO
L3. Bone Marrow-Derived Mesenchymal Stem Cells Attenuate Right Ventricular Remodeling & Preserve Function In Neonatal Swine Brody Wehman, University of Maryland, Baltimore, MD
L4. Ex Vivo Lung Perfusion with Adenosine A2A Receptor Agonist Decreases Ischemia-Reperfusion Injury in Non-Heart-Beating Donor Lungs Subjected to Prolonged Cold Preservation
Cynthia E. Wagner, University of Virginia, Charlottesville, VA
L5. An Annexin V Home-dimer Protects against Ischemia Reperefusion Induced Acute Lung Injury in Lung Transplantation Kohei Hashimoto, University of Toronto, Toronto, ON, Canada
L6. Beneficial Role of Antigen Commensalism in Mesothelin-Targeted T-cell Therapy for Lung Adenocarcinoma
Adam Jason Bograd, New York University Medical Center, New York, NY
L7. Impact of Aortic Annular Geometry on Aortic Valve Insufficiency: Insights from a Pre-clinical, Ex-vivo, Porcine model
Talal Al-Atassi, University of Ottawa, Ottawa, ON, Canada
L8. Creation of a Novel Endosymbiotic System for Photon Powered Myocardium in the Ischemic Heart Jeffrey E. Cohen, Stanford University, Stanford, CA

For additional details regarding the presentations, abstracts, and authors, please visit www.aats.org/annualmeeting
ANNUAL MEETING
AATS WEEK 2015    95th Annual Meeting, Seattle, WA

TUESDAY, APRIL 28, 2015    7:00 – 8:40 am
Moderators: *Frederick Y. Chen & *Juan A. Crestanello

F1. Intraventricular Papillary Muscle Banding is an Effective Technique to Repair Ischemic Mitral Regurgitation in Dilated Ventricles: comparison with annuloplasty in a chronic swine model
Muralidhar Padala, Emory University, Atlanta, GA

F2. Injectable Shear-thinning Hydrogels Deliver Endothelial Progenitorcells, Enhance Cell Engraftment, Increase Vasculogenesis, & Stabilization of Ischemic Myocardium
Ann C. Gaffey, University of Pennsylvania, Philadelphia, PA

F3. Transesophageal versus Transcranial Motor Evoked Potentials to Monitor Spinal Cord Ischemia
Pasquale Totaro, IRCCS Foundation Hospital San Matteo, Pavia, Italy

F4. Inhibition of microRNA-29c-Induces Cerebroprotection in a Rat Model of Prolonged Hypothermic Circulatory Arrest by Targeting PGC-1a
Tianxiang Gu, First Hospital of China Medical University, Shenyang, China

Keshava Rajagopal, University of Maryland, Baltimore, MD

F7. Differential Regulation of Intracellular Calcium Homeostasis Between Sevoflurane Postconditioning & Delayed Ischemic Preconditioning in an Isolated Rat Heart Model
Yang Yu Fuwai, Cardiovascular Hospital, Beijing, China

F8. Multidisciplinary Histological & Mechanical Study of Aortic Aneurysm to Investigate Potential Parameters for Early Diagnosis of High Risk of Rupture
Pasquale Totaro, IRCCS Foundation Hospital San Matteo, Pavia, Italy

F9. Improvements in the ElectrosprayPolycarbonate-urethane Vascular Graft by Effective Surface Modification
Xuefeng Gao, Huazhong University, Wuhan, China; ZUniversity of California, Berkeley, CA

F10. Preventing Allogeneic Immune Rejection by Transplanting MHC-homo Induced Pluripotent Stem Cell-derived Cardiomyocytes to an MHC-matched Non-human Primate
Takui Kawamura, Osaka University, Osaka, Japan

GENERAL THORACIC SURGERY FORUM

TUESDAY, APRIL 28, 2015    7:00 – 8:40 am
Moderators: *Da M. Nguyen & *Benjamin D. Kozower

F11. CD8+ T Cells Contribute to Lung Cancer Progression in a PD-1 Dependent Fashion
Stephanie H. Chang, Washington University, St Louis, MO

F12. Repair of Large Tracheal Defects Using a Bioengineered Neotrachea in a Porcine Model
Adnan M. Al-Ayoubi, Mount Sinai Hospital, New York, NY

F13. Pulmonary Venous Blood Sampling Significantly Increases the Yield of Circulating Tumor Cells in Early Stage Lung Cancer
Rishindra M. Reddy, University of Michigan, Ann Arbor, MI

Pablo G. Sanchez, University of Maryland, Baltimore, MD

F15. High Expression of HOXC6 & HOXC8 Predicts Poor Prognosis of Patients with Esophageal Squamous Cell Carcinoma (EsCC) & Promotes Tumorigenesis through Their Positive Effect on Cell Proliferation
Kengo Chon, Key Laboratory of Carcinogenesis & Translational Research, Beijing, China

F16. Intraoperative Molecular Imaging of Pre-treated Mediastinal Tumors is Feasible
Jane Keating, University of Pennsylvania, Philadelphia, PA

F17. Rapamycin Prevents Bronchiolitis Obliterans Through Increasing Regulatory B Cells Infiltration in A Murine Tracheal Transplantation Model
Yung Zhao, University of Virginia, Charlottesville, VA

F18. AP-1 Inhibitor (SR11302) Inhibits Metastatic Lesion Formation in Ex Vivo 4D Lung Cancer Model
Min P. Kim, Houston Methodist, Houston, TX

F19. Therapeutic Implications & Prognostic Significance of c-Met in Esophageal Squamous Cell Cancer
*Ching Tzao, Taipe Medical University, Taipei, Taiwan

F20. Lysyl-like oxidase 2 (LOXL2) is an Oncogenic Driver of Malignancy Regulated by miR-145 in Tobacco-Associated Esophageal Adenocarcinomas
Shakirat Oyetunji, National Institute of Health, Bethesda, MD

TODAY'S TOPICS

VIDEOS

TUESDAY, APRIL 28, 2015    7:00 – 8:40 am
Moderators: *Song Wan, & Viktor Hraska

V1. A Novel Technique of Aortic Root Reconstruction for Extensive Endocarditis: The Percutaneous Skirt Technique
Kiyoshi Doi Kyoto, Prefectural University, Kyoto, Japan

V2. Use of Fluorescence Imaging to Define the Intersegmental Plane during Robotic Segmentectomy
*David C. Rice, University of Texas, Houston, TX

V3. A Successful Case of Staged Fontan Operation for a Right Atrial Isomerism Patient with Pulmonary Atresia/MAPCAs, Complicated with Obstructed Supra-cardiac Total Anomalous Pulmonary Venous Connection
Yujiro Ide, Mt. Fuji Shizuoka Children’s Hospital, Shizuoka City, Japan

V4. Fluorescence-Guided Placement of an Endo-Aortic Balloon Occlusion Device for Totally Endoscopic Robotic Mitral Valve Repair
David W. Yaffe, New York University, New York, NY

TUESDAY, APRIL 28, 2015    7:00 – 8:40 am
Moderator: *Y. Joseph Woo

Novel-Transcatheter Technologies
*Vinod H. Thourani, Emory University, Atlanta, GA

T1. Early Clinical Results of Transapical Mitral Valve Replacement for Mitral Regurgitation
Anson Cheung, St. Paul’s Hospital, Vancouver, BC, Canada

T2. Xenoantigenicity of Porcine Decellularized valves to an MHc-matched Non-human Primate
*William E. Cohn, Texas Heart Institute, Houston, TX

T4. Five Years Clinical Outcome of Endoscopic Versus Open Radical Artery Harvesting: A Propensity-score Analysis
Gianluigi Bislerti, University of Brescia Medical School, Brescia, Italy

T5. Point-of-View Video Streaming Promotes Enhanced Resident Surgeon Training & Assessment while Maintaining Quality Assurance & Patient Care
Andrew C.W. Baldwin, Baylor College of Medicine, Houston, TX

T6. Enabling Minimally Invasive Atraumatic Repair of Intracardiac Septal Defects with Light
Assunta Fabozzo, Boston Children’s Hospital & Harvard Medical School, Boston, MA

Cutting Edge Mechanical Circulatory Support Technology
*William E. Cohn, Texas Heart Institute, Houston, TX

AATS WEEK 2015    95th Annual Meeting, Seattle, WA

*AATS Member
TUESDAY, APRIL 28, 2015
7:00 – 8:40 am
Moderators: *Michael A. Acker & *Anlechi C. Anyanwu

37. Concomitant Aortic Valve Repair in Patients Undergoing Continuous-flow Left Ventricular Assist Device Placement: A 10-year Experience & Clinical Implications
Shinichi Fukuhara, Columbia University, New York, NY

38. A Novel & Validated Practical Risk Score to Predict the Need for Right Ventricular Assist Device at the Time of Continuum-Flow Left Ventricular Assist Device Implantation
Steve K. Singh, Baylor College of Medicine, Houston, TX

39. Ipsilateral Lower Extremity Complications in Patients Undergoing Emergent Common Femoral Arteriovenous Extracorporeal Membrane Oxygenator Therapy
Prashanth Vallabhajosyula, University of Pennsylvania, Philadelphia, PA

40. A Decade of Experience with Over 300 Continuous-Flow Left Ventricular Assist Devices at a Single Center
*Ranjit John, University of Minnesota, Minneapolis, MN

41. Risk Factors for Development of Tricuspid Regurgitation post Heart Transplantation & Long-term Outcome of Tricuspid Valve Surgery
Anja Claudia Baier, Deutsches Herzzentrum Berlin, Berlin, Germany

42. A Multi-Institutional Comparison of Adverse Events in Contemporary Continuous-Flow Left Ventricular Assist Device: Do Significant Differences Exist?
John M. Stulak, Mayo Clinic, Rochester, MN

43. Impact of Periportal Fibrosis without Cirrhosis on Outcome Following continuous Flow Left Ventricular Assist Device Implantation
Jonathan E. Sargent, University of Washington, Seattle, WA

44. Severe Pulmonary Hypertension in Patients Undergoing Leftventricular Assist Device Insertion as Bridge to Transplant
Masaki Tsukashita, New York Presbyterian Hospital/Columbia university, New York, NY

45. Lung Transplantation & Concomitant Cardiac Surgery: Is It Justified?
Rafael Andrade, University of Minnesota, Minneapolis, MN

46. New Technique for Reconstruction of the Sternum and Diaphragm in Patients with Congenital Heart Disease
*Rafael Andrade, University of Minnesota, Minneapolis, MN

47. Long-term Survival, Valve Durability, & Reoperation for Four Aortic Root Procedures
*Lars G. Svensson, Cleveland Clinic, Cleveland, OH

48. Adjunct Radiation is Not Associated with Improved Survival in Patients with Positive Margins Following Lobectomy for Stage I & II Non-Small Cell Lung Cancer
Brian C. Gulack, Duke University, Durham, NC

49. Should Asymptomatic Patients Discharged with Lower Hemoglobin Expect Worse Outcomes After Valve Surgery?
*Niv Ad, Inova Heart & Vascular Institute, Falls Church, VA

AWARD PRESENTATIONS

30. Resident versus Attending Surgeon Patency & Clinical Outcomes in Off-pump Coronary Artery Bypass Surgery
G. Hossein Almasi, Medical College of Wisconsin, Milwaukee, WI

51. Incidence & Implications of Postoperative Supraventricular Tachycardia Following Pulmonary Lobectomy
*Brendon M. Stiles, Weill Cornell Medical College, New York-Presbyterian Hospital, New York, NY

52. What is a “Good” Result after Transcatheter Mitral Repair? Impact of 2+ Residual Mitral Regurgitation
Nicola Buzziatti, San Raffaele Scientific Institute, Milan, Italy

LUNCH IN THE EXHIBIT HALL
12:30 – 2:00 pm
ANNUAL MEETING
AATS WEEK 2015    95 th Annual Meeting, Seattle, WA

TUESDAY, APRIL 28, 2015  12:45 – 2:00 pm

MODERATED POSTER COMPETITION Exhibit Hall

Adult Cardiac Moderated Poster Competition
Moderator: *Ralph J. Damiano, Jr.

P1. David vs. Goliath: Valve-Sparing Root Replacement Improves Outcomes Compared to Bentall Procedures in Patients with Aortic Root Dilatation
Maral Ouzounian, University of Toronto, Toronto, ON, Canada

P2. Should We Repair Moderate to Severe Tricuspid Regurgitation during Reoperative Left Sided Valve procedures?
Igor Gosev, Brigham & Women’s Hospital, Boston, MA

P3. Off-Pump versus On-Pump Coronary Artery Bypass Grafting in Patients With Left Ventricular Dysfunction: Analysis of 918 Matched-Pairs
Chikara Ueki, Shizuoka General Hospital, Shizuoka, Japan

P4. Comparison of Clinical Efficacy Between Biatial Epicardial Application of Drug-Releasing Adhesive Hydrogels to Prevent Postoperative Atrial Fibrillation
William Wang, Scripps Memorial Hospital, La Jolla, CA

P5. Amiodarone after Surgical Ablation for Atrial Fibrillation – Is It Really Necessary? A Prospective Randomized Controlled Trial
*Niv Ad, Inova Heart and Vascular Institute, Falls Church, VA

P6. Surgical Treatment of HOCM In Patients with Extreme Hypertrophy, Septal Myocardial Fibrosis & Ventricular Tachycardia
Konstantin Borisov, German-Russian Cardiac Clinic, Moscow, Russian Federation

P7. Ten-Year Follow Up after Prospectively Randomized Evaluation of Stentless Aortic Valve versus Stented Aortic Valve Replacement
Adam El-Gamel, Waikato Hospital, Hamilton, New Zealand

P8. Plenary Presentations & Public Citations from the American Association for Thoracic Surgery
Yusuke Terasaki, Weill Cornell Medical College, New York

P9. Does Grafting Coronary Arteries with Only Moderate Stenosis Affect Long-term Mortality?
*Joseph F. Sabik, III, Cleveland Clinic, Cleveland, OH

P10. Surgical Outcomes of Jehovah’s Witness Patients Requiring Complex Cardiac Surgery
Akiko Tanaka, University of Chicago, Chicago, IL

P11. Long-term Clinical Outcomes of Mitral Valve Replacement with the Hancock II Bioprosthesis
Miheth V. Badawila, University of Toronto, Toronto, ON, Canada

P12. Restoration of Sinus Rhythm & Atrial Transport Function after the Maze Procedure: Box-lesion versus U-lesion Set
*Takashi Nitta, Nippon Medical School, Tokyo, Japan

Congenital Heart Disease Moderated Poster Competition
Moderator: *Richard G. Ohye

P13. Outcomes of Heart Transplantation in Children with Hypoplastic Left Heart Syndrome: Previous Palliated compared to the Norwood Procedure
*Bahaaeldin Alsoufi, Emory University, Atlanta, GA

P14. Burden of Potentially Pathologic Copy Number Variants is Higher in Children with Isolated Congenital Heart Disease & Significantly Impairs Covariate-adjusted Long-term Survival
Daniel Seung Kim, University of Washington, Seattle, WA

P15. Intramural Coronary Arteries are Not a Risk for Mortality in the Arterial Switch Operation
Tyson A. Fricke, Royal Children’s Hospital, Melbourne, Australia

P16. The Surgical Treatment of Atrial Isomerism: Single Center Experience of 353 Cases
*Hajime Ichikawa, National Cerebral & Cardiovascular Center, Suita, Japan

P17. The Impact of Age at Cavo-Pulmonary Shunt (Stage II) on Outcome after the Norwood Procedure. Importance of Elective versus Non-Elective Intervention, Adrian Crucean, Birmingham Children’s Hospital, Birmingham, United Kingdom

P18. More Than Repair The Valve – Effect of Cone Reconstruction on Right Ventricle Remodeling in Patients with Ebstein Anomaly: A DMR Study
Qi An, West China Hospital, Chengdu, China

P19. Mild to Moderate Residual LVOTO may Stop Or Reverse The Progression Of Systemic Right Ventricle Remodeling Process In Adult CTOGA Patients after Physiological Repair
Fucheng Xiao, Union Medical College & Chinese Academy of Medical Sciences, Beijing, China

P20. What is the Procedure Impact on Ventricular Outflow Tract Hemodynamics & Reintervention in Patients with Complex Transposition?
Mohammed K. Al-Jughiman, Hospital for Sick Children, Toronto, ON, Canada

P21. Increasing Complexity of Heart Transplantation in Patients With Congenital Heart Disease
William Y. Shi, Royal Children’s Hospital, Parkville, Australia

P22. Bicuspid Aortic Valve Morphology: Does the Pattern of Leaflet Fusion Determine the Success of the Ross Procedure?
Mark Ruzmetov, Children’s Hospital of Illinois, Peoria, IL

P23. Durable Ventricular Assist Device Support for End-stage Heart Failure: An Extended Role in Pediatric & Congenital Population
Ed Peng, Freeman Hospital, Newcastle Upon Tyne, United Kingdom

P24. Improving Outcomes with the Comprehensive Stage 2 Procedure after an initial Hybrid Stage 1 Palliation
*Mark E. Galantowicz, Nationwide Children’s Hospital, Columbus, OH

General Thoracic Moderated Poster Competition
Moderator: *Michael J. Liptay

P25. Early Initiation of Oral Feeding Following Thoracalaparoscopic Esophagectomy for Cancer: Interim Results from a Randomized Controlled Trial
Yin Li, Zhengzhou University, Zhengzhou, China

P26. Outcome of the Joint Council of Thoracic Surgery Education’s Early Review Course Project
*Mark Allen, Mayo Clinic, Rochester, MN

P27. A Gene Expression Profile Based Test to Predict Neoadjuvant Chemoradiation Response in Esophageal Adenocarcinoma Patients
Weiwei Shan, Castle Biosciences, Friendswood, TX

P28. Metformin Exposure is Associated with Improved Survival in Early-Stage Non-Small Cell Lung Cancer Patients
Robert A. Medairos, Rush University, Chicago, IL

P29. Post-Induction PET Mediastinal Activity Does Not Predict Persistent Nodal Disease or Overall Survival in Patients with Stage IIIA-N2 Lung Cancer
R. Taylor Ripley, Memorial Sloan-Kettering Cancer Center, New York, NY

P30. Should Lobectomy be Performed when Unsuspected pN2 Disease is Found at the Time of Planned Lung Cancer Resection? A National Cancer Data Base Analysis
Chi-Fu Jeffrey Yang, Duke University, Durham, NC

P31. Does Neoadjuvant Chemoradiation Followed by Pneumonectomy Provide Better Long-term Survival in Patients with NSCLC? Cengiz Gebitekin, Uludag University, Bursa, Turkey

P32. Prophylactic Mass Ligation of the Thoracic Duct During Esophagectomy is Associated with a Higher Rate of Chylothorax Than Explicit Identification & Ligation of the Thoracic Duct
Yifan Zheng, Brigham & Women’s Hospital, Boston, MA

P33. Pulmonary Function Changes after VATS Lobectomy Versus Limited Resection for Early Stage Lung Cancers
Zhao Gu, Shanghai Chest Hospital, Shanghai, China

P34. The Incidence & Burden of Venous Thromboembolism after Major Lung Resection: A Prospective Cohort Analysis
Yaron Shargall, McMaster University, Hamilton, ON, Canada

P35. Long-term Survival Advantage of Double Lung Transplantation in Patients with Secondary Pulmonary Hypertension
Joshua C. Grimm, Johns Hopkins University, Baltimore, MD

P36. Perforated Esophageal Interventions: Focus (PERF) Study: A Multi Center Study of Contemporary Treatment
Rob Rice, University of Texas, Houston, TX
ADULT CARDIAC SURGERY Simultaneous Scientific Session

TUESDAY, APRIL 28, 2015 2:00 – 5:35 pm
Moderator: *Thoralf M. Sundt, III
53. Multiple Arterial Bypass Grafting Should Be Routine
Robert F. Trambaugh, Mount Sinai Beth Israel, New York, NY
54. Are all Forms of Total Arterial Revascularisation Equal? A Comparison of Single Versus Bilateral Internal Thoracic Artery Grafting Strategies
William Y. Shi, University of Melbourne, Melbourne, Australia
55. Complete Revascularization Improves Survival in Octogenarians
Spencer J. Melby, Washington University, Saint Louis, MO
56. Full Myocardial Revascularization Purely with Bilateral Internal Thoracic Arteries: Effects on Late Survival, Analysis of 3757 Patients
*Daniel O. Nava, Instituto Cardiovascular de Buenos Aires, Buenos Aires, Argentina

57. Non-Selective Carotid Artery Ultrasound Screening in Patients Undergoing Coronary Artery Bypass Grafting: Is It Necessary?
Khalil Masabni, Cleveland Clinic, Cleveland, OH
58. A 20-year Experience with Isolated Perciavation: Analysis of Indications & Outcomes
Erin A. Gillaspie, Mayo Clinic, Rochester, MN
59. Early & late Surgical Outcomes of Infective Endocarditis among Intravenous Drug Abusers: Results from Two Large Academic Centers
Joost Bum, Maastricht General Hospital, Harvard Medical School, Boston, MA
*AATS Guidelines: Ischemic Mitral Valve Regurgitation
*Irving L. Kron, University of Virginia, Charlottesville, VA

GENERAL THORACIC SURGERY Simultaneous Scientific Session

TUESDAY, APRIL 28, 2015 2:00 – 5:35 pm
60. Hybrid Therapy for the Hypoplastic Left Heart Syndrome - Myth, Alternative or Standard?
Can Yerebakun, Pediatric Heart Center Giessen, Giessen, Germany
61. Selective Management Strategy for Neonates with Interrupted Aortic Arch Mitigates Future Left Ventricular Outflow Tract Obstruction Risk
*Bahaadlin Alsoufi, Emory University, Atlanta, GA
62. Impact of Pacing on Left Ventricular Function in L-Transposition of the Great Arteries
Sophie C. Hofferberth, Boston Children’s Hospital, Harvard Medical School, Boston, MA
63. Comparison between Two Surgical Techniques to Repair Total Anomalous Pulmonary Venous Connection at a Single Institute: 81 Cases with Sutureless Technique versus 98 Cases with Traditional Technique
Yu Rim Shin, Yonsei University Severance Hospital, Seoul, Republic of Korea

AORTIC / ENDOVASCULAR SURGERY Simultaneous Scientific Session

TUESDAY, APRIL 28, 2015 2:00 – 5:35 pm
Moderators: *Scott A. LaMaire & *Allan S. Stewart
75. Long Term Comparison of Aortic Root Operations for Marfan Syndrome: Bentall versus Valve-Sparing techniques
*Duke E. Cameron, Johns Hopkins Hospital, Baltimore, MD
76. Open Repair of Ruptured Descending Thoracic and Thoracoabdominal Aortic Aneurysms in 100 Consecutive Cases
Mario F.L. Gaudino, Weil Cornell Medical College, New York, NY
77. Total Aortic Arch Replacement with the Thoraflex Hybrid Fused Ele- phant Trunk Prosthesis. Report on the first 100 Patients in a Single Center
*Malakh Shrestha, Hannover Medical School, Hannover, Germany
78. Total Aortic Arch Replacement: Predictors of Adverse Outcomes for Hybrid Arch Exclusion versus Traditional Open Repair in 319 Patients
Suk Jung Choo, Asan Medical Center, Seoul, Republic of Korea
Jeffrey E. Keenan, Duke University, Durham, NC
80. Aortic Dissection with Arch Entry Tear: Surgical Experience in 104 Patients during a 12-Year Period
Wei-Guo Ma, Yale University, New Haven, CT
81. Remodeling of the Remnant Aorta after Acute Type A Aortic Dissection Surgery: Are Young Patients More Likely to Develop Adverse Aortic Remodeling of the Remnant Aorta Over Time?
Suk Jung Choo, Asan Medical Center, Seoul, Republic of Korea
82. Prophylactic First Stage Elephant Trunk for Moderately Dilated Descending Aorta in Patients with Predominantly Proximal Disease
Mahnaz Karimi, Cleveland Clinic, Cleveland, OH
83. Long-term Benefits of Surgical Pulmonary Embolectomy for Acute Pulmonary Embolus on Right Ventricular Function
William B. Keeling, Emory University, Atlanta, GA
84. Long-Term Follow-up of Aortic Intramural Hematomas and Penetrating Ulcers
Alan S. Chou, Yale University, New Haven, CT

CONGENITAL HEART DISEASE Simultaneous Scientific Session

TUESDAY, APRIL 28, 2015 2:00 – 5:35 pm
Moderator: *E. Dean McKenzie & *Michael E. Mitchell
64. Characterization & Outcomes of Severe Primary Multi-Vessel Pulmonary Vein Stenosis in Low-Birth Weight Infants
Ashley Dickens, Boston Children’s Hospital, Harvard Medical School, Boston, MA
65. Pre Operative Predictors of Survival after Repair of Pulmonary Vein Stenosis
Mauro LoRito, Hospital For Sick Children, Toronto, ON, Canada
66. Improvement of Cardiopulmonary Exercise Capacity after Pulmonary Valve Replacement & its Predictors in Patients with Pulmonary Regurgitation after Repair of Tetralogy of Fallot
Yu Rim Shin, Yonsei University Severance Hospital, Seoul, Republic of Korea
67. Intermediate-term Neuro-Developmental Outcomes after Neonatal Cardiac Surgery: Role of Cortical Iso-Electric Activity
Michael Swartz, University of Rochester; Rochester, NY

EXECUTIVE SESSION AATS Members Only

For additional details regarding the presentations, abstracts, and authors, please visit www.aats.org/annualmeeting
IN CASE YOU MISSED IT!

Listen to a summary of the 95th Annual Meeting scientific programming from the adult cardiac surgeon perspective.

*John S. Ikonomidou, University of South Carolina, Charleston, SC

85. Insights into Flow Hemodynamics in Externally Stented Vein Grafts
*David Paul Taggart, University of Oxford, Oxford, United Kingdom

86. The Rise of New Technologies for Aortic Valve Stenosis: A Propensity-score Analysis from Two Multicenter Registries Comparing Sutureless & Trans-catheter Aortic Valve Replacement
Augusto D’Onofrio, University of Padova, Padova, Italy

87. First North American Single Centre Experience with the Enable Sutureless Aortic Bioprosthesis in a High-Risk Surgical Cohort
Benoit de Varennes, McGill University, Montreal, QC, Canada

WEDNESDAY, APRIL 29, 2015 7:00 – 8:40 am

GENERAL THORACIC SURGERY Simultaneous Scientific Session

WEDNESDAY, APRIL 29, 2015 7:00 – 8:40 am

Moderator: *Sudish C. Murthy

IN CASE YOU MISSED IT!

Listen to a summary of the 95th Annual Meeting scientific programming from the general thoracic surgeon perspective.

*Sudish C. Murthy, Cleveland Clinic, Cleveland, OH

Matthew Mulligan, University of Maryland, Baltimore, MD

Mark E. Ginsburg, Columbia University, New York, NY

105. Predictors of Prolonged Air Leak After Lung Resection
Sebastien Gilbert, Ottawa Hospital, Ottawa, ON, Canada

106. Proportion of Newly Diagnosed Non-Small Cell Lung Cancer Patients That Would Have Been Eligible for Lung Cancer Screening
Geena Wu, City of Hope National Medical Center, Duarte, CA

IN CASE YOU MISSED IT!

Listen to a summary of the 95th Annual Meeting scientific programming from the congenital surgical perspective.

94. Late Incidence of Endocarditis & Conduit Failure in Patients Undergoing Placement of Right Ventricular to Pulmonary Arterial Conduits with Bovine Jugular Grafts
Carlos M. Mery, Texas Children’s Hospital, Houston, TX

95. Pulmonary Artery Flow Studies are Useful & Valid in Intraoperative Decision-Making for Patients Undergoing Repair of Pulmonary Atresia with Ventricular Septal Defect & Major Aortopulmonary Collateral Arteries
Jiaquan Zhu, Hospital for Sick Children, Toronto, ON, Canada

96. The Modification of Right Ventricle to Pulmonary Artery Conduit for Norwood Procedure Reduces the Number of Unintended Shunt-Related Events
Tomasz M. Mroczek, Jagiellonian University, Krakow, Poland

97. Right Ventricular Outflow Tract Reconstruction with a Polytetrafluoroethylene Monocusp Valve: A Twenty-year Experience
*John Brown, Indiana University, Indianapolis, IN

89. Robotic Repair of Simple vs. Complex Degenerative Mitral Valve Disease: Clinical & Echocardiographic Outcomes during Mid-term Follow-up
*Rakesh M. Suri, Mayo Clinic, Rochester Minnesota, MN

Hanna Alaaja Jensen, Emory University, Atlanta, GA

91. Anterior Mitral Valve Leaflet Augmentation Repair in Type III Mitral Regurgitation: Lessons Learned
Thomas M. Kelley, Jr., Dwight D. Eisenhower Army Medical Center, Augusta, GA

92. Transapical Off-pump Mitral Valve Repair with Neochord Implantation: clinical & echocardiographic results of 3 Months Follow-up
Colli Andrea, University of Padua, Padua, Italy

Fenton H. McCarthy, University of Pennsylvania, Philadelphia, PA

AATS Guidelines: Sternal Wound Infection
*Harold L. Lazar, Boston Medical Center, Boston, MA

88. Neo-aortic valve Regurgitation after Arterial Switch: Outcomes from a Single Center
Shoujun Li, Fuwai Hospital, Beijing, China

101. Anatomic Variability of the Thoracic Duct in Pediatric Patients with Complex Congenital Heart Disease
Ji Hyun Bang, Asan Medical Center, Seoul, Republic of Korea

102. Double Outlet Right Ventricle with Non-Committed Ventricular Septal Defect
Olivier Villedain, Université Paris Descartes, Sorbonne Paris Cité, Paris, France

98. Repair of Parachute & Hammock Valves in Infants & Children & its Long-Term Outcome
Eva Maria Delmo Walter, Deutsches Herzzentrum Berlin, Berlin, Germany

99. Preliminary Experience in the use of an Extracellular Matrix (CorMatrix) as a Tube Graft: Word of Caution
Narutoshi Hibino, Nationwide Children’s Hospital, Columbus, OH

100. Neo-aortic Valve Regurgitation after Arterial Switch: Outcomes from a Single Center
Shoujun Li, Fuwai Hospital, Beijing, China

101. Anatomic Variability of the Thoracic Duct in Pediatric Patients with Complex Congenital Heart Disease
Ji Hyun Bang, Asan Medical Center, Seoul, Republic of Korea

102. Double Outlet Right Ventricle with Non-Committed Ventricular Septal Defect
Olivier Villedain, Université Paris Descartes, Sorbonne Paris Cité, Paris, France

MASTER OF SURGERY SESSIONS 9:45 – 11:15 am

Adult Cardiac Masters of Surgery Video Session
Congenital Masters of Surgery Video Session
General Thoracic Masters of Surgery Video Session
3 WAYS TO REGISTER AND BOOK HOUSING
1. Online at www.aats.org
2. Call the AATS/Experient Customer Service Desk at 800-424-5249 (USA) or 847-996-5829 (International).
3. Mail/Fax Registration forms can be downloaded from www.aats.org.

REGISTRATION INFORMATION Early Bird Registration Deadline: March 18, 2015

MEETING FEES
Courses & Symposia
Saturday and Sunday April 25 - 26, 2015

<table>
<thead>
<tr>
<th></th>
<th>On or Before 3/18/15</th>
<th>On or After 3/19/15</th>
</tr>
</thead>
<tbody>
<tr>
<td>Physician</td>
<td>$225</td>
<td>$325</td>
</tr>
<tr>
<td>Allied Health</td>
<td>$125</td>
<td>$225</td>
</tr>
<tr>
<td>Resident/Fellows/Medical Student</td>
<td>No Charge</td>
<td>$100</td>
</tr>
</tbody>
</table>

Prices are shown for each day.
Register for a Saturday course and/or Sunday symposium and you will have access to all other courses/symposia taking place that same day.

95th Annual Meeting
Monday to Wednesday April 27 - 29, 2015

Registration Packages
- AATS Week 2015 – Register for both Mitral Conclave and the 95th Annual Meeting and receive $100 off the Mitral Conclave registration fee.
- Resident/Fellow and Medical Students – Save $100 by registering before the early bird registration deadline.
- Allied Health Package – Save $399 by registering for the Annual Meeting and both the Saturday Courses and Sunday Symposia.

For letters of invitation or for more information on registration packages, please visit our website at http://aats.org/annualmeeting/Registration-and-Housing.cgi.

HOTEL INFORMATION Housing Deadline: March 18, 2015

MEETING HOTELS
- Sheraton Seattle 1400 Sixth Avenue. Headquarter Hotel, less than 1 block from the Convention Center
- Grand Hyatt Seattle 721 Pine Street. Less than 1 block from the Convention Center
- Hyatt Olive 8 1635 8th Avenue. 2 blocks from the Convention Center
- Westin Seattle 1900 Fifth Avenue. 5 blocks from the Convention Center

AATS WELCOME RECEPTION
Sunday, April 26, 2015, 5:00 – 7:00 pm
Exhibit Hall - Washington State Convention Center

Admission to the event is complimentary for all registered attendees.
Join us as we officially celebrate the opening of this year’s 95th Annual Meeting. Visit with our valued exhibitors and supporters where you will learn cutting edge techniques, and discover groundbreaking new products while networking with other attendees.

AATS ATTENDEE RECEPTION
Tuesday, April 28, 2015, 7:00 – 10:00 pm
The Museum of Flight
$85 per person

Don’t miss this year’s Attendee Reception at the largest private air and space museum: The Museum of Flight. It has more than 150 aircraft in its collection, including the famous Blackbird, the only remaining Boeing 80A, and the Aerocar III.

ANNUAL MEETING SOCIAL PROGRAMS

TOURS
Woodinville Wine Excursion
Sunday, April 26, 2015 12:30 – 4:30 pm
$77 per person

Boeing and Future of Flight Tour
Monday, April 27, 2015 9:00 am – 1:00 pm
Future of Flight Aviation Center & Boeing Assembly Plant
$57 per person

Tastes of Pike Place Market Tour
Tuesday, April 28, 2015 9:15 am – 1:15 pm
Pike Place Market
$78 per person
UPCOMING AATS CME MEETINGS

AATS Grant Writing Workshop
March 27, 2015
Doubletree Bethesda
Bethesda, MD, USA

AATS Mitral Conclave
April 23 – 24, 2015
New York Hilton Midtown
New York, NY, USA

AATS 95th Annual Meeting
April 25 – 29, 2015
Washington State Convention Center
Seattle, WA, USA

2015 Heart Valve Summit: Medical, Surgical & Interventional Decision Making
October 1 – 3, 2015
Radisson Blu Aqua Hotel
Chicago, IL, USA

AATS Focus on Thoracic Surgery
October 23 - 25, 2015
Seaport Hotel and World Trade Center
Boston, MA USA

AATS Aortic Symposium
May 12 - 13, 2015
Sheraton New York
New York, NY, USA

AATS 96th Annual Meeting
May 14 – 18, 2016
Baltimore Convention Center
Baltimore, MD, USA
